## PROFILE

Described as dedicated and eager to learn, I am someone who thrives on embracing new knowledge and challenges. With a strong sense of responsibility, I consistently prioritize tasks and ensure completion with precision. Additionally, I am committed to being readily available to provide assistance and mentorship whenever needed.

## EDUCATION

**Chemical Laboratory Technician** CBTIS No. 128 2017 - 2020  
*Specializing in Chemical Laboratory Technology, gaining skills in chemical analysis, lab techniques, and safety protocols.*

**Aeronautical engineering** UACJ 2020 - 2024  
*As an Aerospace Engineering student, I focus on designing and maintaining aircraft and spacecraft, driven by my passion for advancing aerospace technology.*  
- Thesis: Coatings and electrochemical corrosion

## WORK EXPERIENCE

**Planning Trainee** BRP 12.2024 - 8.2024  
*Coordination, Supply chain Inventory management, Communication, Analysis, Planning*  
- Problem-solving  
- Time management  
- Meetings with Canadian and American suppliers  
- Pre-shipment confirmation  
- Tools: Microsoft Office (Excel - Macros), SAP

## CERTIFICATES

**Corrosion engineering and protection methods** 01.2024

**Six sigma** In progress

## INTERESTS

I have a strong passion for engineering and technology, with a deep interest in the repair and maintenance of complex systems, from automobiles to electronic devices. My fascination extends to aeronautical engineering and the technical intricacies behind airplanes. Additionally, I am enthusiastic about the wide applications of technology, including advancements in the medical, automotive, and electronic industries, as well as my expertise in computers and programming.
